At Steele Accelerated High School, our students have a strong desire and academic focus to accelerate their learning. Steele students are highly motivated to put forth the effort required both during and outside the school day to graduate early, earn significant college credit during the school day after acceptance to partner colleges and universities, and/or become a licensed cosmetologist after acceptance to our Cosmetology Academy. All students will have opportunities to learn in a variety of ways, including traditional classrooms, web-based instruction, community service, and dual credit. Along with the support of Northwest ISD, our parents, and our community through mentoring, internships, financial assistance, community service, and more, students will graduate as college- or career-ready adults, ready to "Choose Your Future!"

Kendra Langston, Academy Facilitator klangston@nisdtx.org

Collegiate Academy Objectives:

- To provide students of Northwest ISD expanded opportunities to enhance and accelerate their education through dual credit college coursework
- Allow students the opportunity to experience the rigor of the college-level learning environment while receiving support from Steele advisors, whose focus is to facilitate a successful college experience

Facts and Figures:

- College-level dual credit courses also meet high school graduation requirements
- Dual Credit coursework begins in 9th grade
- Students can complete the **Texas Core** – 42 hours of credit that transfers to *all* Texas public colleges
- Some also choose to complete the 60 hour Associate degree

Cosmetology Academy Overview:

The Cosmetology Academy and Sheers of Steele are dedicated to the success of each future salon professional. The Academy prepares each student for a rewarding career as a licensed cosmetologist.

Did You Know. . .

- The Cosmetology Academy allows students to explore a wide range of careers available in the industry
- Students will be prepared to earn cosmetology licenses through the Texas Department of Licensing and Regulation
- Students explore vital industry skills:
 - Entrepreneurship
 - Leadership
 - Professional productivity
 - Responsibility
